Remote Backup

Are you protecting your most valuable business asset?

What would happen if you lost all the data on your computer - backup tapes and all?

Studies show most businesses that experience a catastrophic loss of computer data never recover. **NetLink Remote Backup** can help protect your business by using your internet connection to send copies of your critical data files to our off-site data storage facility every night. There's nothing you have to do. The system is automatic, affordable, and secure. No one can access your data, not even us. Your most valuable business asset will always be safe, even if your computers are not.
